

WHOA!

IT'S GETTING REALLY **HOT** IN HERE!

Leaving a pet alone in a parked vehicle can be dangerous.

Temperatures can skyrocket inside the vehicle in no time. On an 80° day, the temperature in your car can reach 114° in a matter of minutes!!

In these conditions, pets can quickly suffer heat stroke, brain damage, or even **die** in a hot car.

When running errands, please leave your pet at home where he'll stay safe and cool.
